

Lab Task - 5

Write the following classes:

Book
String bookId String bookTitle String authorName int publicationYear
Book() Book(String bookId, String bookTitle, String authorName, int publicationYear) void showDetails()

Write a class **Start** that contains the main() method. Inside the main() do the followings:

- Create four objects (**b1, b2, b3, b4**) of the **Book** class using parameterized constructor.
- Create an array of Book with size 5.
- Assign the b1, b2, b3 and b4 objects in the Array of Book.
- Show the details of all the books from the array.
- Assign **null** in index 2 of the array.
- Show the details of all the books from the array.

Lab Task Submission Guidelines:

1. Keep all the .java files in a folder.
2. Zip the folder.
3. Rename the folder according to your Id. For example: if your id is 12-21219-2, your folder name MUST be 12-21219-2_LT_5.
4. Upload the zipped folder.
5. Submission deadline is "Exam Week Day 5, 3:00pm".
