

## Lab Task - 6

Write the following classes:

```

public class Start
{
    public static void main(String [] args)
    {
        SavingsAccount sa = new SavingsAccount();
        sa.setAccountNumber("1111111");
        sa.setAccountHolderName("OOP1");
        sa.setBalance(10000);
        sa.setInterestRate(7.5);

        FixedAccount fa = new FixedAccount();
        fa.setAccountNumber("1111112");
        fa.setAccountHolderName("OOP1");
        fa.setBalance(100000);
        fa.setTenureYear(10);

        Bank b = new Bank();
        b.setName("DBBL");
        b.setSavingsAccount(sa);
        b.setFixedAccount(fa);

        //Now print all the details of the bank using the get methods.

    }
}
    
```
